

# ROTOMOULDED SQUATTING SLABS

Anti-Slip  
Surface

Lightweight  
and Durable

Secure  
Foot Lock

K. K. Nag Private Limited has over six decades of experience in polymer innovation. Our rotomoulded squatting slabs are built on years of real-world field learning in sanitation and emergency response situations. These slabs were originally developed to overcome the limitations of heavy multi-material emergency sanitation platforms and have since been refined through extensive testing and feedback from international humanitarian teams working across diverse regions.

Today, our NagMagic squatting slabs are trusted and widely used in sanitation programmes across Asia and Africa. Designed with a strong, single-piece structure for rapid deployment, they offer durability, stability and easy handling in challenging environments. Available in different models including one using recycled content, they provide reliable field-ready solutions for community sanitation, disaster relief and large-scale development projects.

## Rotomoulded Squatting Slab Models

Sr. No.	Product	Dimensions (mm)	Weight (kg)	Colour
1.	Squatting Slab (Small Size)	600 x 800 x 50	5.80	Beige
2.	Squatting Slab (Large Size)	1,200 x 800 x 55	10.80	Beige
3.	Slim Slab	1,200 x 800 x 40	9.30	Black

## Why choose K. K. Nag Squatting Slabs?

### **Durable and Long-lasting**

Manufactured using high-quality plastics engineered to resist cracking, weathering and daily wear.

### **Hygienic and Easy to Clean**

Smooth, non-porous surface prevents odour retention and bacterial growth.

### **Affordable and Accessible**

Specially priced to support large-scale government schemes, NGOs and CSR initiatives.

### **One-Piece Construction**

Moulded on one piece, without the hassle of multiple parts being joined by fasteners that can fall off in the field.

### **Lightweight and Easy to Install**

Simple design that can be installed with minimal effort, making it ideal for rapid deployment.

### **Safe and Comfortable**

Anti-slip, ergonomic design for comfortable use, even for children and elderly users.

### **Customisable**

Available in multiple sizes, colours and models to suit varied needs.

### **Eco-Conscious Solution**

Supports national sanitation drives and contributes towards Swachh Bharat Abhiyan and sustainable living.

## Applications

### **Refugee Camps and Temporary Settlements**

Ideal for rapid latrine setup in high-crowd situations.

### **Community and Institutional Sanitation Projects**

Designed for large-scale sanitation needs in schools, health centres and public facilities.

### **Government and NGO Schemes**

Ideal for deployment under national and international sanitation missions.

### **CSR Initiatives**

Perfect for organisations supporting sanitation, hygiene and sustainability programmes.

### **Public Sanitation Facilities**

Robust and durable for shared and high-traffic use.

# Why Choose K. K. Nag Pvt. Ltd. for Your Rotomoulding Solutions

## In-House Design and Engineering

in managing wall thickness, draft angles and structural design for high-quality rotomoulded components.

## Advanced Moulding

Capability to mould large, complex, single-piece components with multi-layer construction.

## Rapid Tool Development

Efficient development of fabricated and cast aluminium moulds to support faster project execution.

## Seamless Transition from Pilot to Production

End-to-end support from concept and prototyping to full-scale manufacturing under one roof.

## Why It Matters

- Accelerated Time-to-Market
- Lower Development Costs
- Improved Product Performance
- Aligned Technical Collaboration
- First Time Right Manufacturing
- Scalable Local Production
